PROFESSIONAL PROFILE

Self-motivated technology enthusiast with 14 months of remote work experience and practical exposure to Python, FastAPI, web development, Linux, Docker, Git, AI and cybersecurity. Experienced with building and working with web-based platforms and server-side technologies, with an interest in Android security research and remote-control server architecture. Comfortable learning independently, working remotely and solving technical problems. Seeking an opportunity in software development, backend engineering, DevOps or cybersecurity.

CORE TECHNICAL SKILLS

Programming	Python, PHP, Node.js
Backend & Web	FastAPI, Laravel, Web-based platform development
DevOps & Systems	Linux, Docker, Git
AI & Security	AI, Ethical Hacking, Android Security / Hacking
Security Platforms	C2 (Android remote-control/server systems), SCLUB (web-based platform)

PROFESSIONAL EXPERIENCE

Remote Work Experience | 14 Months

- Worked remotely for approximately 14 months in a technology-focused environment.
- Gained practical experience with independent task execution, online collaboration and technical problem-solving.
- Worked with Python, web technologies, Linux and development tools as part of ongoing technical projects and learning.

TECHNICAL FOCUS

- Backend development with Python and FastAPI.
- Web platform development and server-side technologies.
- Linux, Docker and Git-based development workflows.
- Android security research and C2/remote-control server concepts.

EDUCATION

Secondary School Certificate (SSC)

LANGUAGES

Bangla (Native) • English • Hindi

PROFESSIONAL STRENGTHS

- Self-learning and adaptability
- Remote work and independent task management
- Problem-solving mindset
- Interest in backend development, DevOps and cybersecurity
